Product collections

Designed for flexibility, long-term use and everyday operation.

We believe movement is a natural part of a healthy workday. Developed in collaboration with the *Balance is Motion* design studio, PERSOMA brings active comfort directly to your workspace. By combining physical flexibility with multifunctional elements, the collection encourages everyday interaction and helps you build a more engaging, comfortable environment.

Product collections

PERSOMA

Anchored by a strong and highly versatile structural platform, SET UP provides a reliable foundation for any modern workplace. The modular system effortlessly scales from individual desks to complete office layouts. With its clean aesthetic and practical adaptability, the collection is built to handle shifting work cultures and whatever your space needs next.

TAK blends timeless design with everyday functionality, drawing on our heritage of traditional craftsmanship and honest materials. The collection delivers desks, meeting tables, and smart storage built for long-term durability. Thanks to its clean construction and adaptable configurations, TAK seamlessly fits into both focused work zones and dynamic offices.

The MOVE ME collection brings playfulness and real flexibility to modern workplaces that are in constant motion. Its modular storage and multifunctional pieces quickly adapt to your current needs, supporting both active collaboration and quiet, individual work. The result is an open space that is remarkably easy to transform.

The PHS system focuses on pure simplicity and everyday usability to deliver highly efficient workspace organisation. It provides flexible storage and workstation solutions that easily adapt to specific project requirements, all while keeping a clean and incredibly durable design.

OUR STORY

Founded in the Czech Republic in 1991
by four friends with a shared passion
for carpentry, PROFIL combines traditional
craftsmanship with modern manufacturing
and a new generation of leadership.
