The pace of work keeps accelerating and demands are growing. Yet the human body still has its limits. To perform at our best, we sometimes need to change the rhythm. That's why the PERSOMA collection brings balance to the office. Refined details and versatile designs enable you to adapt the space — whether you need calm for focused work, energy for collaboration, or simply a moment to yourself.

# PEERS

The collection is built around a construction of flattened oval profiles and L-profiles. The subtle shapes appear light yet give the frames strength and stability. The same detail is echoed throughout the entire range, creating a cohesive look. Materials are chosen with both function and atmosphere in mind – acoustic surfaces soften noise, metal lends elegance and durability, and black plywood offers a natural, sustainable aesthetic.

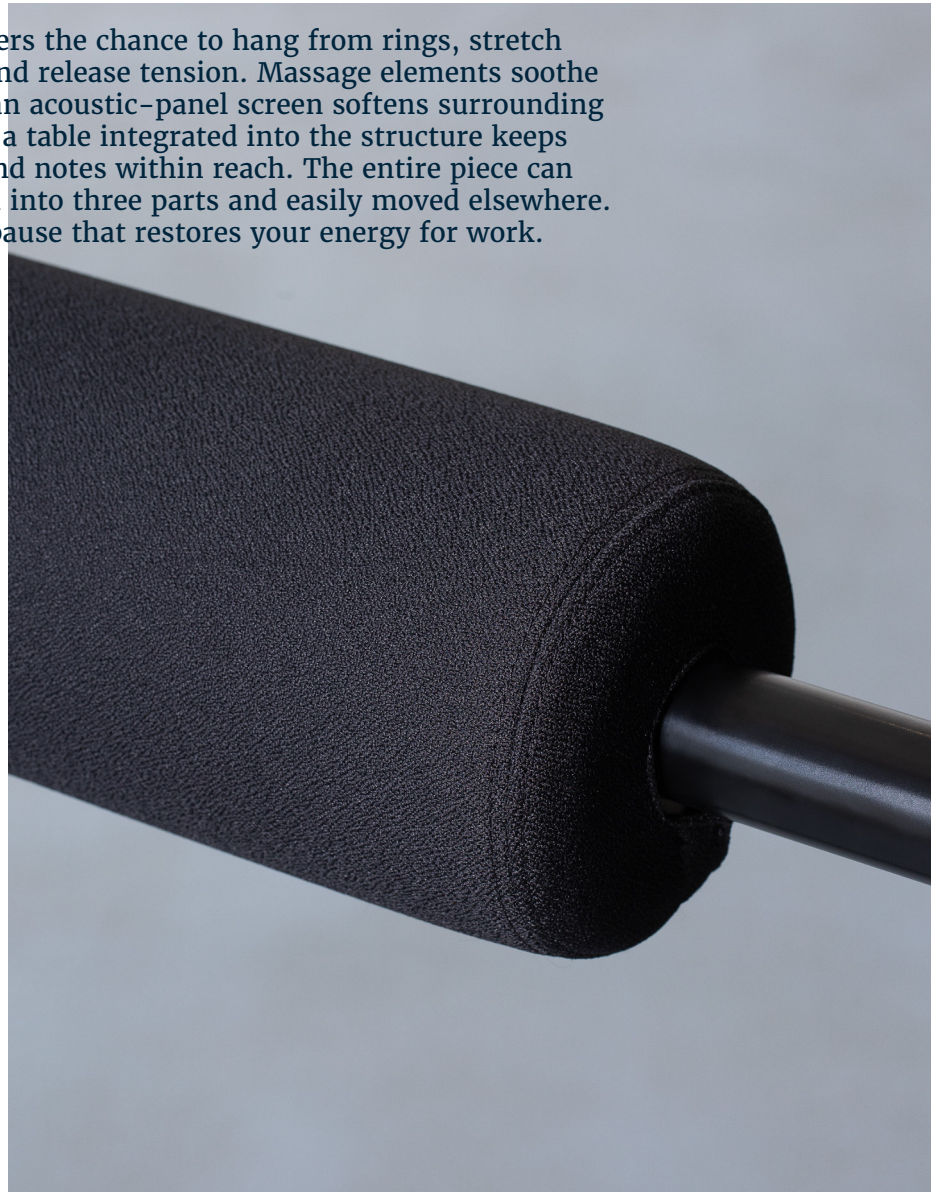

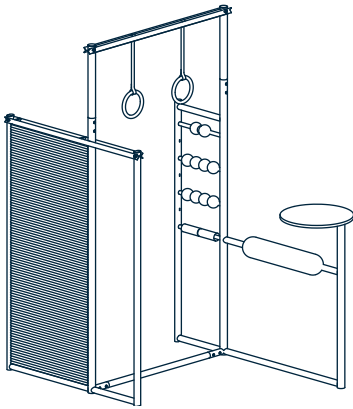

Each element can be taken apart and reassembled, making it easy to adapt to the space and the changing needs of the office. The collection therefore combines technical sophistication with a sense of lightness that supports a healthy balance between work and rest.

# PERSOMA Olymp

Office spaces come with their own soundtrack—keyboards tapping, notifications pinging, voices from meetings. At this pace, the body tightens until it forgets how to relax.

Olymp offers the chance to hang from rings, stretch your arms, and release tension. Massage elements soothe your hands, an acoustic-panel screen softens surrounding noise, and a table integrated into the structure keeps your cup and notes within reach. The entire piece can be dismantled into three parts and easily moved elsewhere. A short pause that restores your energy for work.

# PERSOMA plank

Sometimes you need a space to focus on your own; other times you need a desk that can accommodate your whole team. Plank does both.

When the tabletop is folded down, it passes easily through narrow doorways and can be moved into smaller offices without fuss.

The cable runs through the leg into an electrical channel beneath the tabletop, so even when devices are plugged in, the work surface stays clean and uncluttered. And when you fold the tabletop up, its underside becomes a bulletin board for notes and ideas. The refined construction of steel pipes and L-profiles looks light, yet it supports everything you expect from a work desk.

# PERSOMA box & bar

The box can be easily adapted to any office. Thanks to its wheels, you can move it wherever you need. Drawers made from acoustic material absorb noise, while the metal front gives them an elegant finish. Some versions include an upholstered seat, so the box can also serve as a perch. It opens smoothly and quietly, ensuring your workflow remains undisturbed. The combination of flattened oval profiles and L-profiles adds strength and creates a unified look across the collection.

A bar attached to the box extends its functionality, allowing you to hang a noticeboard, light or greenery—instantly changing the atmosphere of the office. A different perspective, a different position, a better idea.

# ADD

Everyone relaxes differently. Some need more light, others a little quiet or a touch of greenery. That's why you can tailor your office to suit your needs. Add-on elements complement the frame with exactly what you want – a noticeboard for ideas, a shelf for lucky charms, plants for peace of mind.

Small details that make a big difference to your well-being.

PRO  
FIL

## Table

Part of the bar that rotates as needed. The black-stained plywood surface is sturdy and practical – perfect for holding a mug, phone or quick notes. Everything is always within easy reach.

## Notice board

One side is upholstered in Buxkin recycled leather, helping to dampen noise. The other side features a magnetic board with a surface you can write on using a marker. Your ideas will always be in sight.

## Flower pots

Painted metal pots that can be hung individually or stacked one beneath the other. Together, they create a green wall that softens the open office and brings a touch of nature into the workplace.

## Cascading Shelves

Steel shelves with a fine textured finish hang directly on the frame. They can be easily stacked to create space for documents, plants and small items.

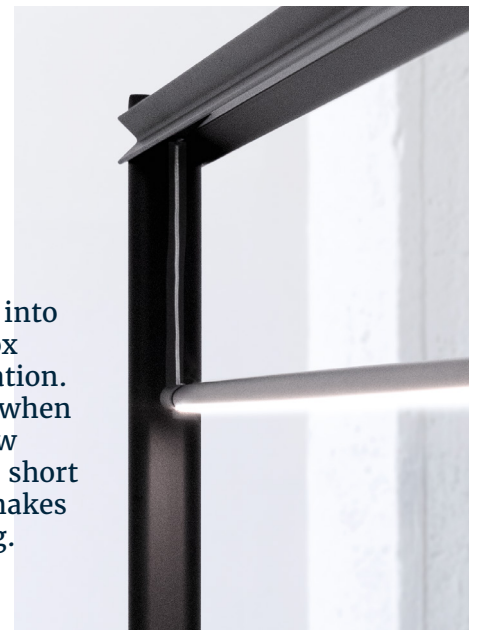

## Hanging System

A signature detail of the collection. The combination of a flattened oval profile and two L-profiles creates a gap designed to hold special 3D-printed elements. Thanks to these, you can easily hang a noticeboard, flower pot, table or shelf.

## Lights

The LED light is integrated into the frame, providing the box with soft, pleasant illumination. Perfect for those moments when you want to sit aside, review your notes or simply take a short break. A small detail that makes the space feel more inviting.

# PROFIL

The modern office is no longer just a place to work.  
It is a space where concentration and relaxation,  
body and mind, individuals and teams come  
together. The PERSOMA collection brings balance to  
coworking spaces and open-plan offices – furniture  
that moves with you and reminds you that comfort  
is essential for performance.

Design that transforms work into an environment  
where you truly want to spend time.
