PROFIL NÁBYTEK a.s.

This Czech company has over twenty years of experience in furniture manufacturing and development. In 1996 he started focusing on interior furnishings for health services and social services. Our main goal is to provide the best services for our customers and guarantee the best quality and comfort of our products. This catalogue is a guide to all our products and services. We are innovative and we try to maximize the functionality of our interiors. We offer all kinds of services from consultancy, proposals, and projects to budget proposals. I offer our own production, transportation and assembly. We consult with our investors and professionals to make sure that you get the best solution for your project with minimal costs.

DESCRIPTION OF IMPLEMENTATION OF THE PROJECT

AFTER RECEIVING A REQUEST FROM OUR COSTUMER, WE CHOOSE OUR TEAM TO PROCESS THE ORDER

A SPECIALIST IS GOING TO SUPERVISE THE PROJECT AND HE/SHE WILL INFORM THE CUSTOMER ABOUT THE PROCESS

WE WILL MEASURE THE INTERIOR

AFTER THEY CONSULTATION, OUR ARCHITECTS WILL START PREPARING THE PROPOSAL. THEY WILL PREPARE A ROUGH DRAWING WITH TECHNICAL PARAMETERS OR 3D VISUALISATION

PROJECT MANAGER PREPARES A PRICE OFFER AND OTHER POSSIBLE SOLUTIONS TO HELP YOU MINIMIZE YOUR COSTS

IF THE COSUMTER APPROVES THE PROJECT, PRODUCTION BEGINS

TRANSPORTATION AND ASSEMBLY

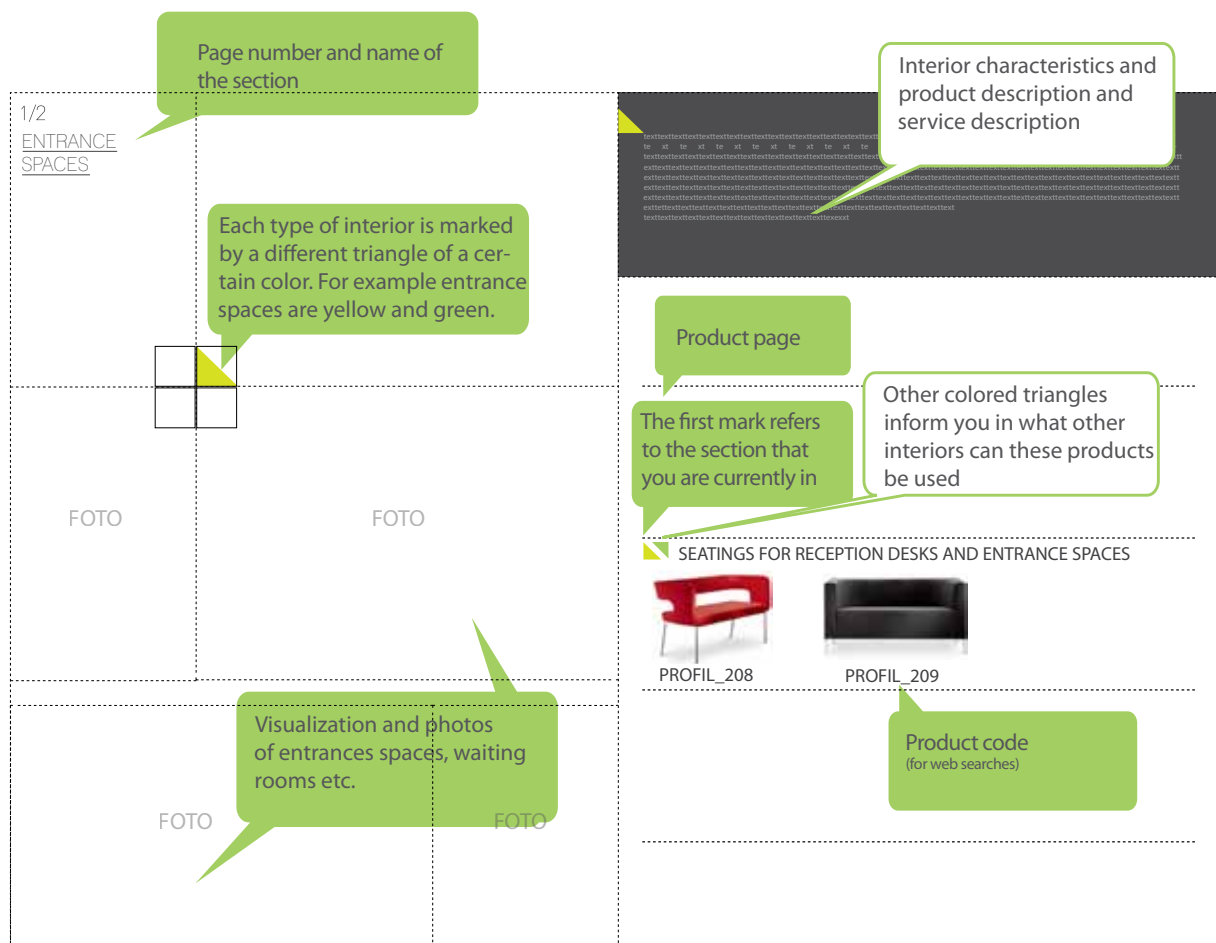

DELIVERY

We approach each project individually, whether it is a small order or something more complex. We create not only functional interiors but also special interiors that are very esthetic and functional. Each new project is a challenge for us to create functional interior and find its originality so that it combines esthetics and quality. We work with Czech and international suppliers in the area of health services. We believe that the devil is in the detail and we applied the same philosophy to this catalogue. This catalogue represents some basic types of interiors that can be found in health care services and in social care furnishings. It has ten parts that are color coded. Each part has photos and visualizations of projects from our architects. The selection was made to give you an idea about our products otherwise our selection is ever changing and expanding. Our products are suited for more than one interior.

Any technical or other information can be found on our website **www.profil-nabytek.cz**. Each product has its code that will lead you to our website. If you have any question you can contact us on this email **obchod@profil-nabytek.cz** or calls us on this number: **+420565300111**. We are looking forward to our future cooperation.

HOW TO WORK WITH OUR CATALOGUE

1/2

ENTRANCE SPACES

RECEPTION DESKS

WAITING ROOMS

Entrance spaces and reception desks function as an introduction to any facility. They are therefore very important and they should be representative and make the visitors and patients feel pleasant. We make sure we treat each reception desk area and entrance hall with the care and originality it deserves. We take into account the environment, nature, and historical context of the area. One of the most important parts of these interiors is desks. These desks should be the dominant element of the whole interior because these are the places where visitors get all their information.

SEATING FOR RECEPTION AND ENTRANCE SPACES

SOFAS FOR RECEPTION AND ENTRANCE SPACES

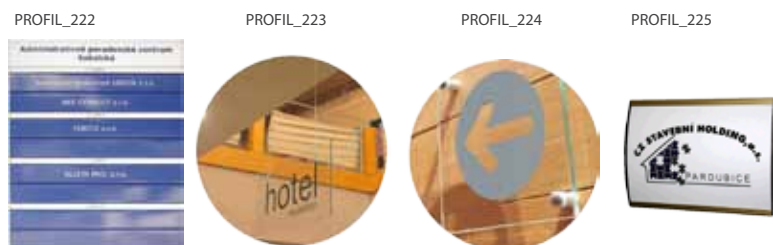

MULTI SEATER FOR WAITING ROOMS

LIGHTING

ORIENTATION SYSTEMS

ORIGINAL PAINTINGS FOR YOUR INTERIORS

DINING HALLS

SOCIAL CLUBS

LIBRARIES

DAY CARES CENTERS

One of the important social spaces for retirement homes are libraries, chapels, day care centers, classrooms for the University of the Third Age, dining halls and social clubs with computers. These are the places that we seek all our life – places for education, our rituals, eating and a place where we get together with our friends. These activities are important in every age and that is why we should be able to provide such places in our retirement homes. We tried to use new technologies that put fun activity motifs and imitation on laminated desks. We are inspired by local folklore and history to create these motifs. We would like to create the best memories for patients.

LABORATORIES

SPECIAL WORKSPACE

We know that any work done in laboratories requires precision and quality. They are not just about organization but also about productivity. So it is our duty to create space that would enable the most effective work and the best workplace for its employees. It is crucial then to look at some of the aspects that will affect comfort and usage during work. It must be sanitary, ergonomic and usable. It needs to have a modern design that will create comfortable and good atmosphere. You can choose from a variety of products - special work tables, lockers and shelves.

WIDE SELECTION OF CURTAIN AND VENETIAN BLINDS

We created a variety of furniture elements based on our wide experience gained from many conversations we had with nursing personnel, doctors and patients. The main requirement for this type of bedroom is the quality of nursing beds. Some of them, mechanical adjustable beds, can be manipulated by gas springs to change the vertical position and patients area or by electro motors. Also the right choice of quality and suitable mattress is very important. For long lying patients a special anti-decubites mattresses are necessary.

LŮŽKA

Economy bed with executable barriers, option to choose full or folded fronts, solid or mechanical adjustable slatted bed base
PROFIL_1001

Bed RETRO with decorative motifs, adjustable slatted bed base
PROFIL_1002

Adjustable with electro motors, highly functional and easy to use
PROFIL_1003

Adjustable with electro motors, lateral slant, stability and safety
PROFIL_1004

Lower height of bed space, variable system of side boards, easy mobility
PROFIL_1005

MEDICAL MATTRESSES

PASSIVE ANTIDECUBITE MATTRESS

ACTIVE ANTIDECUBITE MATTRESS

Anti-decubite one sided mattress for patients with lower level of decubitu development
PROFIL_1006

Anti-decubite one sided mattress for patients with higher level of decubitu development
PROFIL_1007

Layered antidecubite mattress for patients with lower risk of decubite development
PROFIL_1008

Active mattress used in combination with standard foam mattress. It is suited for patients with standard risk of decubite development
PROFIL_1009

Effective pressure placement – due to combination of visco-foam and air it is easier to transport and store. It is very easy to clean and disinfect. Inflatable mattress.

VARIOUS TYPES OF SOCKLES FOR POLYGON OFFICE FURNITURE

CONFERENCE ROOMS

TRAINING PLACES

Because we spend some much time in our office we want to make sure it meets all the criteria of functionality, ergonomics, and esthetics. That is why we try to create office interior that would create great environment and where you will feel happy. We therefore make custom made furniture to satisfy your every need. We have created Polyglon and Progres system for your office furniture. Progres offers a variable office system including tables and other accessories that can be assembled to any shape or size. Polyglo was created to correspond with the newest designs and was created by professional Czech designers. Both systems have specially constructed edges that create useful handles.

FACILITIES
FOR PERSONNEL

CLOAKROOMS
AND CHANGING ROOMS

In the health care services and social care services the main emphasis is on the needs of patients but we also should not overlook the need for space for doctors and other personnel. We make changing rooms, cleaning rooms, kitchen or rooms for doctors. These rooms are important areas where the personnel rest. So it is important to create and furnish these rooms with quality and esthetic furniture. Our lockers are designed to maximize storage room and to be safe and easy to use. We use ironwork from a prestigious company Blum and other European manufacturers.

BALNEO RELAX

REHABILITATION CENTERS

GYMS

CENTRAL BATHROOMS

One of the main problems of our society today is the lack of exercise that can lead to obesity and other health problems. Because we have demanding jobs we lack enough time and energy for physical exercise. That is why gyms are becoming an essential part of retirement homes and other health care facilities. Gyms are equipped with exercise bicycles and other equipment. The interior should be visually attractive, light and spacious. And installed furniture should not be in the way of any exercise happening in the area. After a good exercise the body needs a place to relax or rehabilitate. We furnish these facilities with adjustable folding bed and various screens and dividers. Central bathrooms can be furnished with any type of bath, hoisting devices that can help patients with reduced mobility.

KITCHEN FOR HANDICAPPED AND DISABLED PEOPLE

This kitchen was created in cooperation with Mga. Veronika Loušová. She stressed ergonomics, functionality and quality of this product. The main goal of this facility is to help and make life easier for handicapped and disabled people. The main element is special work desk without lower cabinets that gives better access to the wheelchair. The design of the sink desk and cook top enable to turn the wheelchair. Instead of the upper small cupboards we used revolving carousels and elements from the „wire program“. There is also a corpus with a special auxiliary help desk that slides out and can be used to put away any objects. If the corpus has an oven there the auxiliary desk slides to the side.

KITCHEN UNITS FOR THE IMMOBILE

Height adjustable work board and cupboards are controlled by electro motors

PROFIL_1800

Frame construction enables height adjustment
Attach construction to the wall, ceiling or partition wall
Work board and its components are height adjustable within this range: 65-95 cm
Width: 160, 180 or 200 cm
max. height: 222 cm/ minimal height: 192 cm
depth with mechanism: 71 cm

Drawer container is movable from the edge of the desk to the sink

PROFIL_1801

Et the economy type is without the height adjustability - one time anchorage

The kitchen unit is completed with movable containers. Upper cupboards have sliding mechanism with shelves that enable better accessibility.

EQUIPMENT FOR MATERNITY WARDS AND NEW BORN HOSPITAL WARDS

Our newest products are equipment for children's wards in hospitals, doctor's offices and maternity wards. These are changing tables for newborns and toddlers. They can be either mounted to the wall or rooted on the ground. We also offer children's baths or beds for newborns.

Cabinet with storage, scale, changing table and mounted child bath
PROFIL_1802

Pendant tipping changing table, infant beds for children's hospitals and home care
PROFIL_1803

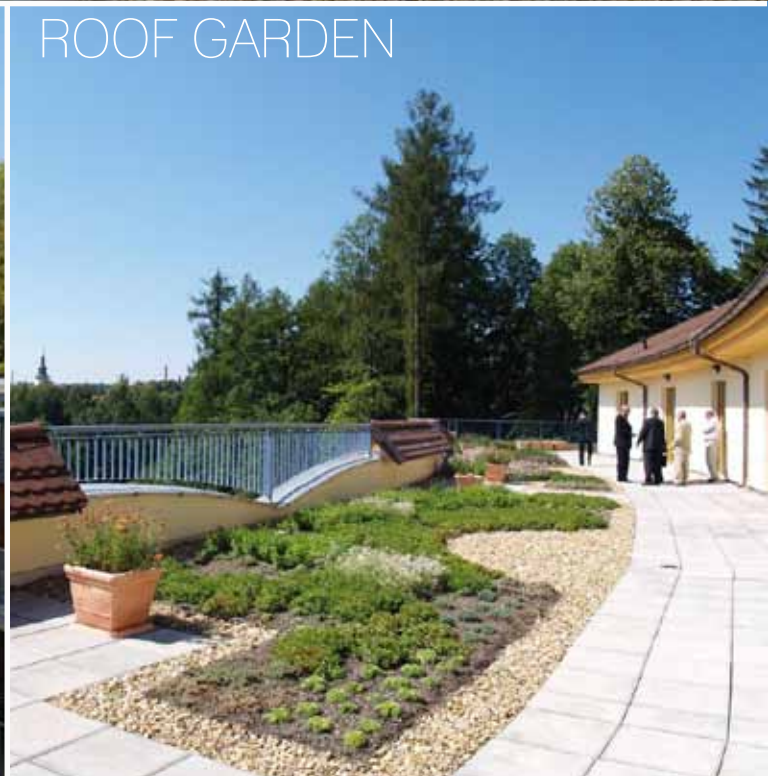

A bed for infants with removable tub, height adjustment, for pediatric clinic and home care
PROFIL_1804

EXTERIORS

ROOF GARDEN

ATRIUM

Nature is man's most natural environment because we spend a lot of time being surrounded by it and we relax and take energy from it. That is why we have not forgotten to design and manufacture a wide choice of garden furniture and other accessories. Outdoor space is also very important for patients in the hospitals and other facilities. It needs to be easily accessible so that patients can enjoy some fresh air. Architects should make sure that every building has enough balconies, gardens, courtyards and atriums. Our garden furniture is made out of a variety of materials – metal, wood, natural and synthetic rattan. It is important that people have a healthy combination of outdoor and physical activities to battle any ailments they might have.

Spas are the place where people go to relax and cure themselves. We offer complex interior design. Our main goal is to make sure that the interior is appealing and visually stunning and we do not forget the importance of functionality and comfort for its visitors. Many people seek out spas not only for relaxation but to spend their holidays here. That is our motivation to create attractive interiors with interesting colors that will have an everlasting impact on each visitor.
