TECHNICAL DESCRIPTION OF SECTION PART-FURNITURE „PRAKTIK 2“

Section part-furniture „PRAKTIK 2“ enables to form unlimited number of various configurations in different colours. It is mainly intended for health service, houses of welfare and offices. Front surfaces of furniture can be made either from melamine smooth boards with ABS edges around (price 1) or moulded laminate boards MDF (price 2). When you form configurations, it is possible to turn the whole cases and make upper cases from lower ones or you can also turn doors with holds down. It is necessary to assign the type of opening right or left (left or right hinge) and the kind of cases upper or lower in case of one door cases. It is possible to equip single cases and wardrobes with locks according to the customers' requirement. Central locking or a lock can be used only in top drawer. Simple shapes of metal holds are used for health service and offices, these holds are lathed or made from flexible leather as a safety device in case of houses of welfare. Cases standing on the floor can be provided with adjustable legs from „REHAU“ company. Plinths with sealing profile making wet cleaning possible are put on these legs with the help of staples. The second variation is usage of single adjustable legs which make enough space under the cases so the easy wet cleaning is possible. Low adjustable round plinths can be used under the most of office configurations. Thus we can create not only table configurations but also low case configurations which have to be even up to the same height with the help of covering boards with the same thickness as the table boards have. It is possible to use terminating annular laths made from moulded MDF boards or melamine boards with ABS edge in the top parts of case configurations. These laths can also be used under the upper cases of working (kitchen) configurations. Dining, working and coffee tables might have metal or wooden blockfeet. This section part-furniture „PRAKTIK 2“ can be completed with the table line of office furniture „PROFIL“. Tables are made with adjustable metal or full tabular socles.

We mention only the basic line of beds and mattresses in the price list. The offer is wider according to the patient's (client's) handicap. We are able to extend our offer and tender other assortment of health furniture and complements for the complete furnishing of some special workplaces. It is possible to add unusual components to this sector in case of special requirements.

You can use our services during the furnishing of more complicated interiors. We ask you for sending us a simple design because of check, in case of concrete order.
